

AN ATLAS SYSTEM

Your all-in-one ISO Management System Solution

QMS Connect delivers all the tools you need to achieve and maintain ISO compliance.

With simple navigation and intuitive processes, accessible online via your computer, tablet or smartphone 24 hours a day, QMS Connect helps you manage, track and report ISO metrics, driving continuous improvement across all aspects of your Management System.

QMS Connect helps you to engage your teams, so that you can capture data that will drive business decisions – increasing repeat business, reducing customer complaints and ultimately saving you both time and money.

SUPPORTIVE

Connect with the experts at QMS through QMS Connect's integrated query management functionality or use the substantial library of useful templates, guides, videos and documents – all of which can be customised to suit your business needs.

COMPLIANT

QMS Connect helps you to create comprehensive audit trails that provide insight into the history of records created, modified, archived, electronically signed and transmitted for each ISO Management System.

DYNAMIC

Access your documentation easily, at the click of a button, and adapt it securely, to incorporate new processes and products, as you need them.

SECURE

QMS Connect is a secure, cloud based, centralised repository where you can control user access, benefit from automated version control and ensure documents are accurate, up-to-date and in use, at all times.

INTERACTIVE

Accessible from any location, at any time, QMS Connect makes it easy for you to engage your team and stay in control. Add, annotate or remove documents when you need to, set specific responsibilities for team members and receive notification of changes as they happen via the easy to use dashboards and reports.

Why choose QMS Connect?

Cloud-based, integrated system

All information relating to your Management System is stored in one secure, cloud-based platform. QMS Connect makes it easy for users, across your business, to access the management system, regardless of time and physical location.

System and document management

Documented processes can be located, updated or downloaded easily, within the tailored, process-based management system. Add commentary, view audit reports and contracts, manage version control and electronically add your signature to approved documents, as required.

Templates and automation

Record key information relating to your Management Systems by editing templates from the pre-configured template library or by securely uploading your own, direct from your desktop. Supplied templates can be customised with your own fonts and logos.

Reporting

QMS Connect offers clear, consistent tracking on the performance of your Management System. This enables you to quickly evaluate performance using dashboard views of non-conformances, customer complaints and your overall risk score.

Why choose QMS Connect?

Task/Project management

You can view, edit and report on an unlimited number of tasks within QMS Connect, with automated reminders and task escalation, helping you to ensure individual accountability.

Query management and support

The integrated query management functionality allows you to raise queries and receive support from the experts at QMS, making it easier to get the professional support you need, when you need it.

Company information and user management

QMS Connect puts you in the driving seat. You can manage company information, including contact and site details, as well as inviting new users to the system, thanks to the customisable permissions.

Industry information

QMS Connect ensures you remain up-to-date when changes are carried out on your ISO Management Systems, when existing ISO Standards are revised and when new, beneficial products are available from QMS.

Access QMS Connect today

With simple navigation, real-time reporting and the ability to modify and extend content on the go, QMS Connect keeps you in control.

Already a customer?

Contact your dedicated certificate development consultant today and, for a small fee, they will be able to transition your existing Manual onto the QMS Connect Platform, unlocking the benefits of this process-based, dynamic management system.

Trusted by customers

“ We found the consultant to be extremely helpful and very knowledgeable, he made time for us and really helped us with his advice during the audit. We don't normally give feedback due to time restraints on our daily duties but feel he really deserves the effort in return for his. ”

Tim Lomas,
Principal School Improvement Advisor
- CfBT Education Trust.

“ Over the many years that I have been audited on all types of things I found the QMS auditor to be one of the best auditors that I have had to work with. His manner and customer skills were excellent, and he is a credit to the company. ”

Mark Wisbey,
Anglo Ashesives and Services Limited
