

BS 10012

Demonstrate to customers and interested parties that you manage their personal data responsibly.

Protect your reputation and demonstrate that you manage personal data responsibly.

BS 10012

What is BS 10012?

BS 10012 specifies the requirement to implement a recognised, best-practice Personal Information Management System (PIMS). Covering areas such as data sharing, disposal, retention and risk, certification to this Standard demonstrates that you are managing threats and complying with current data protection legislation.

How to become certified?

Initially we will spend between three and five days on site assessing your current situation in relation to where the Standard requires you to be, drafting the PIMS Manual for you. Following this visit, you will be issued a report detailing any areas which require rectification prior to Certification. Once the agreed rectifications have been made, and QMS have completed the PIMS Manual, Certification is usually possible within a few weeks.

Following Certification, an external audit will need to take place each year to verify your continued compliance with the Standard.

Benefits:

Safeguard your reputation and demonstrate legal compliance

Gain a competitive advantage and improve stakeholder confidence

Identify, manage and reduce personal data risks

Improve information management processes and process efficiency

Reduce the risk of fines, with potential to reduce corporate insurance premiums
