# **Gain your ISO 14001 certification with QMS**

**ISO 14001 is a globally recognised Standard  
for environmental management.**

ISO 14001 can bring you cost savings, improved efficiency and regulatory compliance. And by gaining the certification, you show the world that you care about the future of our planet.

To get certified under ISO 14001, you'll need to demonstrate your capability in terms of environmental impact, management responsibility, resource management and measurement.

If that sounds challenging, don't worry. We'll be with you every step of the way and support you through our online digital management system platform, QMS Connect.

**Let's get started...**

“

We have recently added ISO 14001 to our standards. The QMS consultant went through it in great detail today and explained it fully, together with ensuring we are ready for any issues that may arise. ”

**Martin Brown,**  
Director, Afass

“

I have found the staff to be very helpful whenever I have contacted QMS with a query or a problem... a great help when you are working to tight deadlines. ”

**Robert Watkins,**  
Sales Director, APPS (UK)

## What is ISO?

**ISO certifications are awarded to organisations that meet international standards of best practice.**

They cover vital areas such as quality management, information security, the environment and health and safety, plus many more.

ISO Standards have been developed by leading industry experts from around the world. They're updated regularly to keep pace with changes in regulations, working methods and the expectations of consumers and society.

To gain an ISO certificate, you need to bring your business processes in line with the relevant Standard, then demonstrate your compliance to an auditor. These processes will need to be recorded in a documented ISO management system that you'll need to maintain over time.

Once you're certified, you can display ISO badges on your website and other marketing collateral, so customers, suppliers and other interested parties can see proof of your achievement.

“

Our turnover continues to grow at over 10% a year after gaining certification, which was a very easy process with QMS. ”

**Jon Whitehead,**  
Cleankill  
(Environmental Services)

# Why do you need ISO?

There are two factors here:  
internal and external.

---

## Internally...

- ISO improves the way you work.
  - As you work towards an ISO certification, you'll start to uncover areas of your business that may not be working as well as they could. And as time goes by, you'll find more and more ways to improve.
  - As a result, you'll build a more positive, focused working culture. Your organisation will be more effective and productive, and your people will be more motivated and engaged.
- 

## Externally...

- ISO shows the world that you mean business.
  - It sends a clear message to customers, partners, employees and everyone else that you care about the work you do, and how you do it.
  - Gaining an ISO certification proves that you can deliver what you promise and you want to improve – no matter how good you are already.
  - That unlocks the door to new business opportunities, happier customers and a stronger reputation.
- 

# What is ISO 14001?

ISO 14001 is an environmental management system.

It sets out how you'll save energy, reduce waste and comply with all the relevant legislation.

The diagram shows you what you need to consider when forming your ISO 14001 management system. .

“

We have used a variety of other companies, but QMS's combination of telephone support and online document storage makes a massive difference. ”

**Sam Mansfield,**  
Advanced Security Management

## SUPPORT

How will you provide resources to back up your commitments?

## CONTEXT

How will your system relate to the world around you, and the situation within your organisation?

## LEADERSHIP

Who will take ownership and responsibility?

## OPERATIONS

How can you safeguard the environment throughout the whole product or service lifecycle?

## PLANNING

How will you deal with the unexpected?

## PERFORMANCE

How will you set targets and measure success?

## IMPROVEMENT

How will you find new ways to improve?

As you work through these elements, you'll discover areas where you need to improve. In order to be certified, you'll need to bridge the gap between where you are now and where you need to be before an auditor visits your organisation to confirm you've made the right changes.

ISO 14001 has been developed and refined over many years by the International Organisation of Standardisation (also known as ISO), the world's leading experts in management systems. It's recognised the world over as a sign that an organisation is committed to doing business in a sustainable, environmentally friendly way.

= ISO 14001 QUALITY MANAGEMENT SYSTEM

# Why ISO 14001? Here's how ISO 14001 can benefit you and your customers.

## Benefits for you

### REDUCE COSTS

Use less energy, reduce waste and make better use of resources

---

### IMPROVE EFFICIENCY

Reduce environmental impact throughout your product life cycle

---

### WIN NEW BUSINESS

Improve your public image and gain customers

---

### KNOW YOUR IMPACT

Monitor and control the environmental impact of your operations

---

### ENSURE COMPLIANCE

Comply with legislation and avoid fines or prosecution

“

The QMS consultant ran through ISO 14001. Once again I found him to be full of excellent advice. ”

**Chris Dowling,**  
Operations Manager,  
Cheshire Moving and Storage

## Benefits for your customers

### MANAGE RISKS

Show that you're managing environmental risks

### ETHICAL PROCUREMENT

ISO 14001 shows you're in tune with customers' own values and environmental ethos

### ENVIRONMENTAL ADVICE

You can advise customers of the environmental friendliness of products you provide, including how to recycle or dispose of them at end of life

### ASSURANCE OF SERVICE

Customers can be confident you comply with all the relevant legislation, for example when you're working at their site

### SHARE COSTS

You can pass cost savings on to them if they help with your recycling

### FUTURE FOCUS

ISO 14001 shows that you're a responsible, far-sighted firm that clients can partner with long-term

# Why QMS?

## We support you every step of the way.

Just getting to grips with the requirements can be a challenge in itself. Then you need to create and maintain a range of detailed formal documents. You need to work out what needs to change – and change it. And then you need to seek out a certification provider and pass a third-party audit.

At QMS, we've helped implement over 30,000 ISO management systems for businesses across the UK. That experience has given us the proven skills and experience to support you through the entire process.

We requested a course at short notice, and they were able to fit us in! Our trainer was great, giving us a very comprehensive insight into the internal audit process as well as some really useful background. ”

**Sarah Forbes,**  
Director, Fulbright

## ✓ Documentation

Your ISO management system needs to include all of your ISO-compliant processes and procedures. It needs to be rigorous and detailed, yet also clear enough for everyone to understand.

We can do the heavy lifting by creating this for you, supplying a range of document templates to help you easily implement any required changes while managing your day-to-day operations.

---

## ✓ Gap Analysis

Our gap analysis helps you identify what changes need to be made in order to meet the requirements of the Standard.

Our expert consultants will then provide support and guidance on how best to close the gaps identified, in order to achieve certification.

---

## ✓ Certification

Once you're ready to be certified and we've created your ISO management system for you, a certification audit will need to be carried out to confirm that you're now meeting the requirements of the ISO Standard.

If you already have a documented ISO management system, we can use this to fast-track you to certification.

## ✓ Training

Internal audits, management reviews, non-conformities, manual updates... making ISO work can be a challenge. But we're here to help.

We offer training on every aspect of your management system, so you and your team feel completely confident about using and maintaining it.

Our trainers work onsite, nationwide, all year round.

## ✓ Support

We can offer ongoing support with ISO, whether you're already certified or not.

From just £49pcm, you can get unlimited telephone and email support, plus an annual on-site visit to help you prepare for the external audit.

## Fully accredited

We have been accredited under ISO 17021 by the ASCB, a UK accreditation body that's respected for its integrity and impartiality around the world.

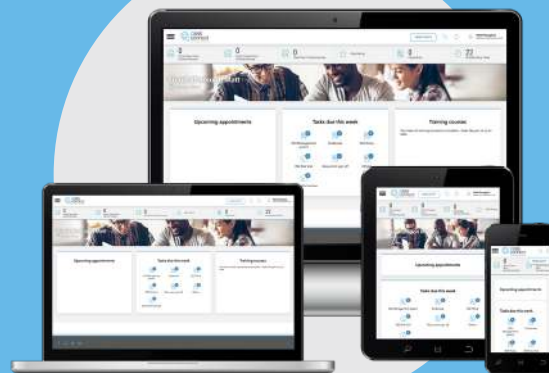

ISO 17021 is the standard for certification bodies. It confirms that we're competent to develop, audit and certify all types of management systems, accurately and impartially.

As a QMS Customer, you'll automatically gain access to QMS Connect, our specially developed online management system platform.

QMS Connect enables us to build your management system for you, share documents and templates, assign tasks during the certification process and inform you of upcoming appointments. It also provides you with a safe location to maintain your management systems, manage tasks, prepare for audits, spot non-conformities, deal with customer feedback and more.

**Through QMS Connect, your team will be able to stay connected. 24/7.**

## How we work

**Our straightforward approach makes ISO simple.**

We're committed to helping you cut costs, boost efficiency and enhance your reputation. That's why we do all we can to strip away complexities and unnecessary paperwork, so you can focus on what really makes a difference.

Here's our three-step process for gaining an ISO certification.

**Depending on your situation, you could gain your certification in just 45 days.**

Once certified, you'll begin a cycle of rolling annual audits, to make sure you're still compliant with the requirements of the Standard.

### What we do:

First, we'll carry out a gap analysis to review your existing processes, and document them in your online management system.

We'll give you templates and guidance to help you fix whatever needs to change.

Through QMS Connect, we'll set you tasks and record the actions agreed during the gap analysis.

These activities will then be prioritised based on how much they will help you achieve certification.

An auditor will check that your processes now meet the Standard.

As long as they're satisfied, and their recommendation is approved, you'll receive your certification.

### What you do:

Before the gap analysis, we'll invite you to join QMS Connect.

You can get familiar with the platform and start completing the documents, so your consultant can spend more time guiding and supporting you.

You must make sure that you carry out the tasks and actions within the timeframe we've agreed.

You'll also need to gather evidence ready for your certification audit.

You'll receive your certificate and certification marks via QMS Connect, ready for you to start promoting your achievement.

From now on, all you have to do is manage your ongoing compliance.

## How we can help you

### Our services are flexible and work around your business.

Want a complete, end-to-end service? Our premium service has everything you need, from initial consultancy through to audit support and certification. It also includes access to our digital platform, QMS Connect.

Need something different? No problem – we can customise our services to meet your specific business needs. If you already have a documented management system in place, whether developed internally or by an external consultant, we can use it to fast-track you to certification – sometimes in just a few days.

Alternatively, if you just need a helping hand with finding out what needs to change, producing your documented management system or preparing for an external audit, we can do that too.

**Whatever your needs, we've got you covered.**

## OUR PREMIUM SERVICE INCLUDES

### Consultancy

- ✓ **Gap Analysis:**  
To highlight any processes that need attention before you can achieve certification.
- ✓ **Stage One Audit:**  
To identify whether your existing processes meet the requirements of the chosen Standard.
- ✓ **Management System**  
Creation of your documented management system, detailing the relevant processes and procedures.
- ✓ **Documentation**  
Templates and tutorial videos to help you ensure the right documentation is in place and is compliant with the chosen Standard.

### Certification

- ✓ **Stage Two Audit:**  
To confirm that your management system reflects your latest processes, that everything is being documented correctly and it is all fully aligned to the Standard.
- ✓ **Certification:**  
Following successful completion of the Stage Two Audit, an accredited certificate can be issued and registered on the International Register of Quality Assured Organisations (IRQAO).

### Compliance

- ✓ **Surveillance Audit:**  
An annual visit. to look again at aspects of the management system and make sure you're still compliant with the Standard.
- ✓ **Re-certification Audit:**  
Taking place every third year, this audit reassess all aspects of your management system and makes sure you're still compliant.
- ✓ **Support:**  
Unlimited phone and email support, during office hours, to help you with your ongoing compliance. Additional support visits can then also be arranged to suit your needs.

# Next steps

## ISO 14001 is often just the beginning.

Gaining an ISO 14001 certification is great. But there are also many other Standards you could benefit from, each one focusing on a different area of excellence.

The more Standards you get, the more familiar you become with the certification process, and the less time and resources you need to devote to it.

We can help you with any or all of these Standards. To find out more, just get in touch and ask for our brochures dedicated to ISO 9001, ISO 27001 or ISO 45001.

After worrying about the outcome of the audit the day before, the QMS consultant made me feel so relaxed and at ease. I couldn't have asked for a better consultant. Very happy with the outcome and look forward to next year's visit. ”

**Lara Harris,**  
Health and Safety Manager,  
B&H Services Air Conditioning

## ISO 9001 Quality management

To keep customers happy, you need to meet their needs and offer them consistent quality. And if you can't, someone else will.

ISO 9001 is a quality management system. It sets out how you'll meet customer needs and continuously improve your products or services. It can also help you increase sales, reduce costs, boost morale, streamline processes and improve supplier relationships.

ISO 9001 certification shows that you are a truly customer-focused organisation, giving you an edge in winning new business and attracting high-calibre suppliers and partners.

## **ISO 27001**

### **Information security management**

Data is a valuable asset. That's why both regulators and consumers want to protect it – and why thieves want to get their hands on it.

ISO 27001 provides the framework for an effective information security management system. It will help you safeguard your corporate data from loss, theft, corruption and unauthorised access.

By gaining an ISO 27001 certification, you demonstrate that you understand how important data is, and make a solid commitment to keeping it safe.

## **ISO 45001**

### **Occupational health and safety management**

Every year hundreds of people are killed and thousands of people are injured while at work. That is why every business has a duty to keep staff members safe at the workplace.

ISO 45001 is the latest recognised Standard for occupational health and safety management. It helps you to reduce workplace risks, build awareness, improve employee safety and make sure your company complies with legislation.

Getting an ISO 45001 certificate shows that you care about the wellbeing of your workforce. That sends a strong message about your commitment to corporate social responsibility.

## Other Standards

- |                      |                                     |                      |                                      |
