Maintain business through disruptive times, protecting revenue and reputation

ISO 22301

What is ISO 22301?

ISO 22301 is the international Standard for Business Continuity Management. It specifies requirements to prepare for, monitor, respond to and recover from disruptive events when they arise. Certification can open up new markets, improve financial performance and reduce insurance premiums.

How do I become Certified?

Initially we will need to spend between three and five days on site assessing your current situation in relation to where the Standard requires you to be. Following this Assessment you will be issued a gap analysis, indicating any areas which require rectification prior to Certification. Once these agreed rectifications are carried out and QMS have produced your Business Continuity Management System Manual, Certification is usually possible within a few weeks.

Following Certification, an annual surveillance audit is required to ensure your ISO 22301 Manual and Certification remain valid.

Recover Systems Quickly

Reduce Financial Losses

Manage Disruptions

Increase Resilience

Improve Performance

Gain Customer Confidence
