

ISO 50001

Improve energy performance, efficiency, use and consumption

Improve energy performance, efficiency, use and consumption

ISO 50001

What is ISO 50001?

ISO 50001 is the international Standard for Energy Management. It facilitates continual energy performance improvements, maximising the use of energy resources and energy-related assets.

How do I become Certified?

Initially we will need to spend between one and two days on site assessing your current situation in relation to where the Standard requires you to be. Following this Assessment you will be issued a gap analysis, indicating any areas which require rectification prior to Certification. Once these agreed rectifications are carried out and QMS have produced your Energy Management System Manual, Certification is usually possible within a few weeks.

Following Certification, an annual surveillance audit is required to ensure your ISO 50001 Manual and Certification remain valid.
