Drive down costs, increase productivity and boost customer satisfaction

Drive down costs, increase productivity and boost customer satisfaction

ISO 9001

What is ISO 9001?

ISO 9001 is the international Standard for Quality Management. It specifies the requirements for organisations, large and small, to successfully implement a Quality Management System which demonstrates to customers that Quality Assurance is of paramount importance to you.

How do I become Certified?

Initially we will need to spend between one and two days on site assessing your current situation in relation to where the Standard requires you to be. Following this Assessment you will be issued a gap analysis, indicating any areas which require rectification prior to Certification. Once these agreed rectifications are carried out and QMS have produced your Quality Manual, Certification is usually possible within a few weeks.

Following Certification, an annual surveillance audit is required to ensure your ISO 9001 Manual and Certification remain valid.
