Manage, track & report ISO metrics across all aspects of your management system

QMS Connect

What is QMS Connect?

Accessible online via your computer, tablet or smartphone 24 hours a day, QMS Connect helps you manage, track and report ISO metrics, driving continuous improvement across all aspects of your Management System.

Documented processes can easily be located, updated or downloaded by users, across your business, within the tailored, process-based management system and all information relating to your Management System is stored in a secure, cloud-based platform.

With reporting dashboards, appointment reminders, automated task management and customisable permissions, QMS Connect ensures you remain compliant and in control at all times.

Benefits:

Secure, cloud- based management system platform

Task management functionality with automated appointment reminders

Inbuilt risk and compliance reporting functionality

integrated query management functionality and help guides

Customisable, pre-configured template library
