Cyber Essentials

Implement technical controls to protect against common cyber attacks.

Implement technical controls to protect against common cyber attacks.

Cyber Essentials

What is Cyber Essentials?

Cyber Essentials is a government-backed Cyber Security Certification Scheme which recognises Organisations that have implemented controls to manage cyber threats and protect against cyber attacks. Once aligned with the scheme, Organisations are able to prevent around 80% of the most common cyber-attacks. Certification demonstrates that your Organisation takes cyber security and the protection of company and client data seriously.

How do I become certified?

An online account will need to be created in the Cyber Essentials Scheme Portal for your organisation to complete the self-assessment questionnaire. Once the questionnaire has been completed it will be reviewed by Secure Business Solutions Limited and, if successful, you will be awarded the Cyber Essentials Certificate.

Organisations seeking the highest level of assurance in cyber security should consider progressing to Cyber Essentials Plus.

5 Key Technical Controls:

Secure configuration

Boundary firewalls and Internet gateways

Access control & administrative privilege management

Patch Management

Malware protection

Delivered in partnership with: **Secure Business** Computing Solutions
