Implement technical controls to protect against common cyber threats.

Cyber Essentials Plus

What is Cyber Essentials Plus?

Cyber Essentials Plus is a government-backed cyber security certification scheme designed to help all organisations of all sizes and across all sectors implement cyber security practices to protect against common cyber threats. Cyber Essentials Plus is the next step on from Cyber Essentials and, of the two, provides the highest level of assurance and confidence in your cyber security.

How do I become certified?

Initially, the Cyber Essentials online questionnaire must be completed. Following this, a gap analysis will take place to help you prepare for the Cyber Essentials Plus Assessment. Finally, the Cyber Essentials Plus Assessment will be arranged, comprising an on site physical test of the organisations systems, before certification is awarded.

It is required that the process be undertaken every 12 months to demonstrate continued compliance with the Certification Scheme.

5 Key Technical Controls:

- Secure configuration
- Boundary firewalls and Internet gateways
- Access control & administrative privilege management
- Patch Management
- Malware protection
